

QUESTIONS TO ASK YOUR GP OR UROLOGIST

It's all about asking the right questions concerning your ED.

If you think you or someone you know may be suffering from ED here are some helpful questions you need to ask your GP or urologist which may help determine the right ED treatment option:

- Is my ED related to a treatable medical condition, will the symptoms resolve with the successful treatment of an underlying disorder like diabetes or hormone issues?
- What are my chances of being able to have an erection without any treatment options?
- What types of ED treatment options are available?
- How effective are they?
- What are the advantages and disadvantages of each of these treatment options?
- What type of treatment do you recommend for me right now? Why?
- If this treatment is not successful, what other options might you recommend?
